Proven full-stack java developer with a passion to learn and work with new technologies that make a positive impact on society. Extremely proficient in Java and JavaScript performance and teaching. Dedicated to learning better ways to write clean and efficient code while keeping up with the newest tech stacks. Searching for my next Java developer role at NETpro System that will leverage my expertise in creativity, analytics, and problem-solving while providing opportunities to grow and enhance my technical abilities.

WORK EXPERIENCE

Comcentric - Full-Stack Java Developer

January 2019 - current

Littleton, CO

- Developed back-end logic in Java to implement a state-wide underwriting model for Colorado State that was used to give policy quotes to over 500,000 potential customers.
- Worked on the customer-facing insurance application to build conditional components in Angular based on factors of applicants, ranging from their location to their type of car.
- Created database structure and logic in Redshift for a new insurance product for pet owners that had a reach of 2,000 customers in its first year.
- Wrote clean, maintainable, scalable, and well-tested code.
- Adhered 100% to standards and best practices around development processes, coding, and peer reviews.
- Supported the technical services team of 7 to resolve customer problems, maintain quality standards, and ensure the responsiveness of applications.

Deloitte - Java Developer

June 2017 - January 2019

Remote

- Delivered, analyzed, and resolved technical issues, and participated in the continuous enhancement of established development processes.
- Designed and built application software with minimal supervision.
- Maintained and enhanced the automated build and deploy process for applications.
- Designed, implemented, and conducted automated unit testing frameworks, saving 8 man hours monthly.
- Contributed to and facilitated architectural discussions that brought out best-of-breed solutions.
- Researched and evaluated methods and techniques to solve problems and reduce friction in development lifecycle, documenting and presenting reports to leadership 2 times a month.
