EDUCATION

B.S.
Computer Science
University of Chicago
September 2014 - June 2018
Chicago, IL

SKILLS

Python
Hadoop
SQL
Linux
Kafka
C++
C#
Java
R
MongoDB
AWS

CAREER OBJECTIVE

Python developer with extensive experience working with Big Data. I am looking to continue developing my skills by collaborating with a Tetra Tech team of solution builders. I am equally comfortable working solo as I am in a group setting.

WORK EXPERIENCE

Python Developer

Qualitative Solutions

March 2020 - current / Los Angeles, CA

- Designed and developed a next-generation real-time data streaming platform with 10,000 monthly users
- Worked with external systems on transaction enrichment and data normalization on 50+ projects for 80+ clients
- Crafted 4 new tools to assist in the analysis of Big Data
- Collaborated with 20+ business users and the core technology team on requirements gathering and system design
- Developed expertise in 5+ new technologies such as Kafka messaging, C++ components, data warehouse integration, SQL, and Linux
- Facilitated data integration on 20+ traditional environments by assessing client's enterprise IT environments

Python Developer

Neuberger Berman

June 2018 - March 2020 / Chicago, IL

- Developed using best practices for Python and R
- Provided solution architecture and design review with 3+ business and technology teams, including new tool selections
- Worked with the information security team in reviewing 1,000+ Python and R user environments, and open-source tool reviews
- Received coaching, and mentoring from 4 senior developers
- Collaborated with 40+ other technologists to communicate and gain consensus over ideal technology solutions
- Partnered with 4+ application service delivery groups for delivery and service management
